## MSc in European Economy and Business Law

The purpose of this programme of study in the sphere of international relations is to meet the demand for economic and business expertise with a focus on European institutions and international organisations. Students hone the crucial skills and acquire the essential tools necessary for employment in government agencies, business consulting firms, non-governmental agencies, public administration, research institutes and universities.

Enrolled students may also benefit from the SOAS of London dual title degree programme agreement, created to provide an additional advantage for EEBL students who intend to widen their intellectual horizons. Students

study the first year in Rome and the second year in London, and upon completion, they receive two MSc. titles. International exchange opportunities, internships and other pertinent activities available through the programme will further enrich their academic experience as well as their future professional careers.

The University of Rome Tor Vergata continues to uphold its tradition of excellence. The first in Italy to offer bachelor, master and doctoral degrees in English, the School of Economics at Tor Vergata has become increasingly recognised for its professors with noteworthy international experience and a high level of quality research in the field of economics.
